Summary

Database Design

Create database structure for this Project

Login & Role Management

Design login page UI.

Set up user authentication and role-based access control.

Test login functionality for different roles.

Incorrect user access to restricted sections

Implement Login functionality with forget password feature

Detect errors in changing password

Rooms Management

Design room check-in/check-out UI

Design Room's management UI

initial Implementation of room availability and status updates.

Unable to check in check out rooms due to some conflicts in API or database system

Add Room Functionality

Errors in adding rooms due to server issues

Test Rooms Add functionality by adding multiple rooms

Test Rooms check in check out functionality by assigning room to customer

Implement Update / Delete Functionality of Rooms

Implement check in check out with bill calculation

Errors in calculating Bills for the customers

Employee Management

Design employee management UI including Add employee , delete/update Employee

Design attendance tracking UI including mark and view attendance

Design shift management of Employees UI

Design pay and view Salary of Employees

Design Employee's Promotion UI with view history form

Add functionality for adding Employees

Unable to add employee data in some cases due to API or datatypes

test Add employees Functionality by adding multiple employees in database

Implement Delete Functionality of employee

Unable to delete data in some cases due to database issues

Implement Employees Pay salary functionality By finance manager

Conflicts in datatypes and error in loading data from database to server

Implement view salary by manager as whole and view salary by Employee

Conflict in finding Employee when Employee log in ,and data loading due to server API

Implement Employee Information Updation

Unable to update Employees information due to wrong data columns and data in database

Employee's Shift management

Employee Promotion

Employee's promotion History

Employee Attendance mark

View Attendance of Employee

Test the Functionalities of Employees Shift

Bug hunting in Employees management

Customer Feedback

Design feedback form UI for customers reviews

Implement Feedback functionality of customer and then manager view that feedback

Errors in reading feedback from database due to server or API

Finanace Management

Automatic expense managment

Profit inspection Graph (Future addition)

Stock Management (Future addition)

Testing System

Test all login and role Functionalities

System Bug hunting

Testing Feed back management

Testing Employee Management

Testing Room management

Testing Finanace management

Status Assigned to Sprint
